EXPERIENCE

V-School
August 2018 - November 2018

Fullstack JavaScript

I chose to embark on a new career path. I found value in the Computer Programing world and began to foster a new career beginning with school. I attended "V-School" in Salt Lake City Utah. During my attendance at V-School, I received instruction in computer programing languages. **HTML**, **CSS**, **JavaScript**, **React**, **Node.js**, **Express.js**, and **MongoDB** are some of the things i worked with during my time there. The training also provided instruction on problem solving, unit testing, and version control as this pertains to computer programing code. Upon graduation from the course I obtained my certificated showing my proficiency in these areas.

Petro West
October 2017 - July 2018

Fuel Systems Construction

During my employment with Petro West, I assisted with the construction of fuel stations for use by regular consumers. This construction job taught me hard work and a strong work ethic. I would ensure I was at work on time and did not utilize sick time during my employment with Petro West. I performed tasks commensurate with standard construction duties and physical in nature. I provided manual labor in support of the construction team in efforts to complete construction of various fueling stations.

Discount Tire
June 2015 - August 2017

Apprentice Technician

As an employee with Discount tire, I learned team work and self-discipline. The work involved was very physical. Often times, I was in contact with the general public and learned to accommodate many different types of people and their needs as well as promoting Discount Tire products and services.
