Projects

- Cursive Clothing   Rect | HTML5 | CSS3 | JavaScript | Express | MongoDB | Mongoose
  - Collaborative full stack application, focusing on web token authentication. This app helps users explore different styles of clothing and guides them to the appropriate site to purchase these items.

- PickIt v2   React | HTML5 | CSS3 | JavaScript | Express | Axios/API call
  - Starting from scratch while improving on my original idea, this app enables the user to save all of their favorite sheet music in one place to enjoy later.

- Pick-it   React | HTML5 | CSS3 | JavaScript | Axios/API call | Node.js
  - This app is for artistic people in the musical department. Letting users search for their favorite artist/song and download the tablature/music sheets for the corresponding instruments
